

KEY PERFORMANCE INDICATORS

Status: January 2016

Members of the Forest Solutions Group report annually on the following key performance indicators and collect supporting information to demonstrate performance against the FSG membership principles and responsibilities and prove joint progress in sustainability.

1 LANDSCAPES, FOREST MANAGEMENT & FIBER SOURCING

- Total land area owned, leased or managed (hectares)
- Owned, leased and managed forests certified (%)
- Volume of wood, fiber and forest products intake certified (%)
- Sourcing policy for wood, fiber and other forest products in place and publically available

2 RESOURCE EFFICIENCY & INNOVATION

- Solid waste sent to landfill (%)

3 ENERGY & CLIMATE

- Renewable energy consumption (%)
- Renewable energy sold externally (giga-watt hours)
- Scope 1 and 2 carbon emissions publically disclosed in metric tonnes CO₂ equivalent
- GHG emission reduction initiatives publically disclosed

4 WATER STEWARDSHIP

- Water withdrawn/returned (m³ and %)
- Chemical Oxygen Demand
- Forest certification indicators include water requirements and are representative for this priority area

5 HEALTH & SAFETY

- Number of fatalities (directly employed)
- Number of fatalities (contractors)*
- Lost-time accidents (total number, frequency and severity rate)

6 SOCIAL IMPACT

- Number of employees (directly employed)
- Number of contractors*
- Human rights addressed and upheld by standalone policy or throughout company policies
- Forest certification indicators include social requirements and are representative for this priority area
